

CORROSION NEVER SLEEPS. PROTECTION CAN'T EITHER.

©2009 Hoffman Enclosures Inc.

The largest selection of control enclosures for processing. By far. In demanding processing environments, enclosures are all that stand between your controls and the relentless forces of corrosion. To protect critical controls from exposure, you need the most reliable solutions and the most choices — Hoffman delivers both.

Hoffman offers the broadest selection of engineered cabinets, enclosures and wireway products in the industry for corrosive environments. Protect your controls under any condition, including chemicals, dust, moisture, humidity, washdown, hazardous environments and salt-spray with Hoffman's lines of corrosion resistant enclosures. Available in a wide selection of materials to meet your specific application: Type 304 and 316 stainless steel, aluminum, fiberglass, polycarbonate, ABS and polyester.

Benefit from the largest selection of available standard modifications, and Hoffman's ability to provide unlimited custom and co-developed solutions to your specifications. All from the name you trust. If you're looking for protection that will keep your critical processes and equipment running smoothly, choose Hoffman.
