

save energy

keep it simple

“e” like “easy” to install and commission.

i-3 Control Technology™

Siemens innovative i-3 lighting control technology is easy to use, easy to commission, easy to maintain, & easy to expand. Based on our standard P1 Lighting panel design, i-3 Control Technology uses standard circuit breakers and controlled pods to turn circuits on and off. This provides industry leading reliability over controlled breaker solutions. Let Siemens i-3 lighting control make saving electrical energy simple.

Setting standards with Totally Integrated Power.
